

Laminar Flow Cabinet

Safe Working Environment

Laminar flow cabinet is an equipment which creates partial particles-free environment. Air flow pattern includes horizontal and vertical type, this laminar flow cabinet is vertical type.

Laminar Flow Cabinet-sample protection only

Laminar Flow Cabinet is a work bench or similar enclosure, which creates a particle-free working environment by taking air through a filtration system and exhausting it across a work surface in a laminar or unidirectional air stream.

The laminar flow cabinet is enclosed on the sides and kept under constant positive pressure in order to prevent the infiltration of contaminated room air.

Laminar flow cabinet is widely used in medical research laboratories, hospitals, manufacturing facilities and other research and production environments.
