PORTABLE UV-C CHAMBER "LaboSys™" #SanitoKing ("PortKing" SERIES)

Ideal for limiting the import of pathogens through everyday items like cell phones, food packets, eyeglasses, cell phones & i-pads, laptops, files, stationery tools, and other small items required sterilization.

FEATURES

❖ Maximizes Bio-security protocols.
❖ Kills a majority of viruses in a recommended disinfection cycle (user settable).
❖ Removable Shelf supports small items (Removable to keep office files etc or bigger items).
❖ Provide an effective disinfection operation where no other methods exist.
❖ Stainless Steel (SS-202) or Stainless Steel (SS-340), as ordered.
❖ Easy to use one-button operation.
❖ **Labosys™** Portable UC-C Chamber is an eco-friendly and cost-effective tool that uses ultraviolet C (UC-C) light sterilization to kill viruses and other pathogens before they enter secure areas. The **Labosys™** UV-C light fixes key vulnerabilities found on everyday items like food packets, cell phones & i-pads, laptops, salons, beauty parlors, industries, offices, office files and documents, medical and research labs, hospitals, etc. by destroying the bacteria's ability to multiply and spread disease.

CE CERTIFIED

EASY TO USE

Before entering a secure area, simply place your items into the chamber. Then, after exposing the items to UV-C light for a recommended time, they can be removed.

ADAPTIVE DESIGN

The **Labosys™** Portable UV-C Chamber is ideal for limiting the import of pathogens through everyday items like cell phones, food packets, eyeglasses, cell phones & i-pads, laptops, files, stationery, tools, and other small items required sterilization.

HOW IT WORKS

There are two factors that directly influence the effectiveness of UV-C disinfection: time of exposure and UV-C radiance (intensity) and exposure to UV-C radiation in our chamber resulted in the elimination of >99.99% of common viruses and bacteria.
